

Prior to 2025 all our console tubs have an angled chrome adaptor under the mixer. Figure 1 & 3

Since Jan 2025 all our consoles have been of the flat mount version. Figure 2 & 4

In 2025 / 2026 we have transitioned to water marked mixers that are lead free.

Should your mixer need replacing in the future years or your old mixer needs replacing now.

We can supply our new Mixer together with the new console as a set. The unit will still need to be uninstalled to change the mixer, it is relatively straight forward to change the console at the same time.

In addition to fitting our tap you can also fit any tap you want including our goose neck mixer or any tap you can purchase at a merchant or hardware store. It has a 38mm hole which can accept a variety of mixer bases.

All 3 sizes are available 350, 465 and 565 wide. The console comes with screws to suit the size you have and is available with just the mixer hole for the concealed washer tap models or with the top mount holes either side of the mixer as below photos.

Visit [Consoles for older Tub Units and Smart Tubs](#)

or <https://www.dissco.co.nz/shop/spare-parts/consoles-for-older-tub-units-and-smart-tubs>

to purchase please note the mixer is a separate purchase option at the bottom of the size and type list.
